Christiano Teixeira

Senior Fullstack Engineer

Brazil (UTC-3) | cteixeira.com.br | linkedin.com/in/chriteixeira | github.com/chriteixeira

Summary

Senior fullstack engineer building software since 2007. Started with Java and Java EE, moved to JavaScript and specialized in frontend, UI and mobile with React Native, working across the whole stack from architecture to delivery. For the last five years at Civic, shipped identity, authentication, Web3 and AI products, most recently a secure MCP platform for AI agents and an AI go-to-market agent. Strongest in TypeScript, React, Node.js and React Native, with a product mindset and a focus on agentic AI.

Experience

Civic Technologies

Nov 2021 to present

Senior Fullstack Software Engineer

Full stack across Civic's identity, authentication, Web3 and AI products, with a strong hand in frontend architecture and product decisions.

- **Bryn:** an AI go-to-market agent. Owned the control-plane UI and its design system.
- **Civic Nexus:** a secure MCP platform for AI agents. Led the guardrails engine and the third-party integrations.
- **Civic Auth:** an OIDC and OAuth 2.0 identity provider with public SDKs. Worked on the SDKs and the developer dashboard.
- **civic.me:** a Web3 identity profile with a multichain NFT gallery. Main contributor in 2022.
- **Civic Pass:** identity verification for dApps on Solana, EVM chains and ICP, frontend and backend.

Stack: TypeScript, React, Next.js, Node.js, Prisma and PostgreSQL, AWS (Lambda, SQS, Kinesis, KMS), Kubernetes, Solana and EVM tooling, MCP, agentic AI.

C-Tech IT

Aug 2011 to present

Independent Developer and Consultant

- New products, rescues of existing applications, architecture, infrastructure and DevOps for client companies.
- Web and mobile with React, React Native, Node.js and Vue.js, on AWS, Google Cloud and Firebase.
- Technical training for companies, including Petrobras.

Impeccable Pixel

Apr 2021 to Nov 2021

Lead Shopify Developer

- Front and back end for Shopify stores and apps: setup, theme work and extensions.
- Introduced the team's development process: Git on GitHub, Themekit, separate development and staging environments, pull requests with review, automated deploys with GitHub Actions.
- Estimates for sales, project management when needed, help with hiring.

CI&T

Mar 2015 to Dec 2016

Fullstack Software Architect

- **Vale, GPV-Ferrovias:** the system that controls Vale's train logistics. Front-end architect.
- **Coca-Cola, GO platform:** Coca-Cola's marketing platform for brand sites, on Adobe Experience Manager.

CI&T

May 2008 to Jul 2011

Software Engineer

- Large custom systems for Petrobras and Vale. Grew from junior to senior, acting as developer, technical leader and Scrum Master, and mentored newer engineers.

Earlier

Feb 2007 to Apr 2008

Meritia, Software Developer (mobile media delivery on Java EE) and CEMIG, Software Engineering Intern.

Education

MSc, Computer Science, Universidade Federal de Minas Gerais (UFMG) 2009 to 2011

BSc, Computer Science, Pontifícia Universidade Católica de Minas Gerais (PUC Minas) 2004 to 2007

Certifications

Claude Certified Architect, Foundations, Anthropic

Also from Anthropic: Claude Code in Action, Building with the Claude API.

Languages

Portuguese (native), English (full professional).

Skills

Strongest: TypeScript and JavaScript, React, Node.js, React Native (with and without Expo), UI/UX and product development, agentic AI.

Hands-on with: OAuth and OIDC, Web3 wallet integrations and multichain services, RAG, OpenRouter, Vercel AI Gateway, AWS, Google Cloud Platform, Shopify, CI (GitHub Actions, CircleCI, Jenkins).

Past: Java, Java EE, JSF, Adobe Experience Manager, C++.
